

I appreciate the good work the FCC does to administer the public airwaves. However, I am appalled at the proposal to reduce the current Broadcast Ownership rules. I am VERY much AGAINST the removal of the current rules and would like to see it regulated back at the old levels. When the rules were last relaxed, the quality of broadcast radio suffered. Recently, the Clear Channel Communications company used its ownership of thousands of radio stations to promote its political views and attack anyone who goes against them. Relaxing the ownership rules will continue to degrade radio and allow a few huge companies to deliver their narrow view to the public, squashing out any dissident views. This country was founded by dissidents and the dissident spirit is what keeps this country great. Please do NOT pass Docket 02-277.
